## RESEARCHER IN ORGANIC and MEDICINAL CHEMISTRY In French National Centre for Scientific Research (CNRS)

**2001 to date:** Researcher in CNRS **CR1 (HDR)** (Paris)

**1998-2000:** Researcher in ESPCI (Paris)

**1997-1998:** Post-doct, University of Montreal (Canada) Pr S. Hannessian

**1995-1996:** Post-doct, ESPCI (Paris) Pr J. Cossy

**1994** PhD, University of Nantes (France)

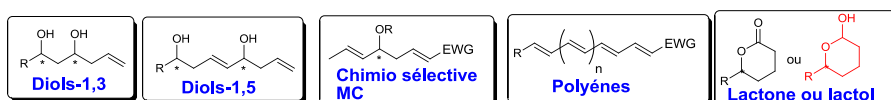

I supervised during all these years, **27** students (8 undergraduate, 8 graduates, 5 PhD and 4 Post doct).

S. Bouzbouz has published **57** articles and **2** patents

Citation in the journal **Chemical & Engineering News** (2000, february 14: page 104 and 108)

**Research interests and skill** S. Bouzbouz is an expert in the development of methodologies Synthetic raw potential that allowed access to a multitude of total synthesis / formal or important synthetic fragments. Include the fostriecin, Passifloricine, (+) - Discodermolide Octalactines, Colletol, Centrolobine, Strictifolione, Leucascandrolide, Amphidinol 3 and Tétrafibricine, molecules with high potential therapeutic.

### Part: Methodology

### Part: Synthesis
