PROFESSIONNAL EXPERIENCES

- 2011-2021 Associate professor at COBRA UMR CNRS 6014 laboratory; Rouen Normandy University, France.
- 1997-2011 Associate professor at LASOC EA 3233 laboratory; Rouen University, France.
- 1995-1996 Temporary Lecturer and Research Assistant, University Institute of Technology IUT of Evreux (France)

EDUCATION

- January 2011 HDR: Habilitation thesis to supervise research – University of Rouen, France
Thesis: "Separation Sciences and Environment".
- Sept. 1996 PhD – University Pierre et Marie Curie (UPMC), Paris, France
Thesis : « Study of the adsorption of complex formulations of nonionic surfactants at liquid/solid interfaces by high performance liquid chromatography. »
LASOC laboratory (Evreux, France). Dir.: Pr P.L. Desbène
- Jul 1992 Master degree « Spectroscopy, organic and biological analyses », University Pierre et Marie Curie (UPMC), Paris, France
Thesis : "Complexation of metal cations by polyethyleneoxide surfactants. Application to the analysis on nonionic surfactants by exchange ion chromatography."
LASOC laboratory (Evreux, France). Dir.: Pr P.L. Desbène

ADMINISTRATIVE & INSTITUTIONAL RESPONSIBILITIES

- 2019-2021 Alternate member of the managing board of COBRA Laboratory.
- 2002-2014 and 2018-2021: Member of the Advisor Commission of faculty specialists (CCSE, section 32) – University of Rouen, France.
- 2011-2016 Member of the extended scientific committee of the FR CNRS 3730 SCALE.
- 2009-2011 Member of the management board of Institute of Technology of Evreux

RESEARCH INTERESTS

My research is focused on the development of solvent-minimized sample preparation and separation science (Liquid (HPLC, nanoLC) and gas chromatography (hyphenated to mass spectrometry)), with a special interest in environmental analysis. Between 1997 and 2002, I worked on water pollution by surfactants, on their behavior at the solid/liquid interface and on the development of trace enrichment processes through solid phase extraction (SPE). Between 2002 and 2009, my topics of interest included analysis of ultra-traces of organic pollutants in exhaust gases (diesel engine exhausts, depollution pilot plant), and optimization (through chemometric approaches) of hydrocarbons extraction from highly sorptive environmental matrices (diesel particulate matter...). This part of my work led me to the field of analysis of organic contaminants in soils, sediments, water and wastes (PAHs, PCBs, PBDEs, pesticides...), as to their degradation products (oxygenated PAHs...). Sample preparation from solids includes hot soxhlet extraction, microwave-assisted extraction, pressurized liquid extraction, supercritical fluid extraction, thermodesorption... Since 2009, I have been also working on remediation technologies to remove pollutants such as metals or PAHs from soils or sediments: enhanced biodegradation by microorganisms or fungi, phytoremediation, electrokinetic remediation.

SCIENTIFIC ACHIEVEMENTS AND EXPERTISE

Academic record (h-index: 17 (2020))

53 publications of which 2 book chapters, 4 invited lectures (academia & industry)
18 international and 24 French oral communications; 25 international and 33 French poster communications.

Projects and fundings:

• 2019-2021:

COPHERL project : « Potential consequences of industrial accidents on human health and the environment, perception and resilience.” Multidisciplinary project (Analytical chemistry, geosciences, combustion physics, toxicology and health...) Normandie Region funding.

COMHYX project : « Fast methodology for the quantification of organic and metallic contaminants in complex environmental matrices through hyperspectral imaging.” Normandie Region funding. Partnerships: M2C laboratory (University of Rouen-Normandie) and Tellux start-up (Rouen).

« Effect of a metallic co-contamination on PAH biodegradation using inoculated fungi for mycoremediation of polluted soils.” ABTE laboratory (University of Caen-Normandie) and BRGM (Orléans) partnerships.

EC2CO project: “Avant Seine: Integrative analysis of pollutants (PAHs, PCBs, hydrocarbons) in sediment cores: geosciences, analytical chemistry, molecular ecology.” CNRS/INSU program, M2C laboratory (University of Rouen-Normandie) partnership.

• 2015-2019

“Persistent organic and inorganic contaminants in fluvial sediment cores: quantification and bioavailability evolution for 100 years accumulation.” Normandie Region and French Seine-Normandie Water Agency funding.

“Application of electrokinetic remediation process to decontaminate Arsenic in accidentally polluted industrial soils.” YARA Society funding, I2C Carnot.

"Evaluation of polybrominated diphenyl ethers (PBDEs) flame-retardants from various materials (plastics, textiles, foams) in seating furnishing wastes." Valdelia Society funding, I2C Carnot.

"Pilot-scale photolysis of pesticides in groundwater and recycled wastewater for agricultural use." Comité Nord-SIPRE (Picardie) and CRT Praxens partnerships.

"New tools for analyzing simultaneously parent and oxygenated metabolites of PAHs in sediments using MSPD coupled to MIPs." Eramus Mundus France-Brazil funding.

"Evolution of the toxicity of dredged sediments (containing mixed pollutants PAHs, PCBs, heavy metals) decontaminated by an electrokinetic process". Normandie Region funding, multi-disciplinary research network SCALE, SEDEVAR research project.

"Potentialities of agronomic plants for phytoremediation of PCB-contaminated Algerian soils." Partnership University USTHB, Algeria.

- **2012-2015**

"Study of contaminant evolution (PAHs, heavy metals) in water/soil/plant systems. Case of LID (Low Impact Development) urban roadways constructions." Funding from INFRA-SERVICES society, Canteleu, France.

"Influence of bio- geo-chemical factors and biosurfactant addition on PAH bioavailability and biodegradation in diffusively contaminated soils." Normandie Region funding, multidisciplinary research network SCALE, RESSOLV research project.

"Analysis of hydroxylated metabolites of PAHs in soils using molecularly imprinted polymers." Partnership with GTS research group of University of Barcelona (Spain) and Polyintell society (Val de Reuil, France).

- **2009-2012:**

"Study of electrokinetic remediation process applied to dredged sediment cleanup." Haute-Normandie Region funding, research network SCALE, RESSOLV project.

"Production and purification of cyclolipopeptidic biosurfactants for environmental use (desorption of lipophilic organic compounds from soils or sediment)." Haute-Normandie Region funding, research network SCALE, RESSOLV project.

- **1998-2009:**

"Study of the potentialities of a laser induced native fluorescence detector for capillary electrophoresis and nano-LC." Partnership with Flowgene Society (St Beauzire, France).

"Optimisation of sample preparation and analytical tools for the analysis of PAHs and nitrated derivatives sorbed on Diesel soot." TOPAASE research program (Toxicology of Atmospheric Pollutants - Aerothermochemistry, Health, Environment), French government-Region contract plan, partnership with the CERTAM (Centre for Study and Technological Research in Aerothermics and Engines), St Etienne du Rouvray, France.

"Collect in aqueous phase of COVs present at trace level in an air stream and quantification by SPE-HPLC." CRAFT European research program ("Depollution of COVs from gaseous releases"); Partnership with the CERTAM, St Etienne du Rouvray, France.

"Mixtures of nonionic and ionic surfactants at water/solid interfaces: competitive or synergistic sorption phenomena." French government-Haute-Normandie Region contract plan.

- **1992-1996:**

"Solid Phase Extraction (SPE) for simultaneous trace analysis of anionic and nonionic surfactants in water." French government-Region contract plan, partnership with the soap and detergent industry's association.

Doctoral research fellow (Research grant from the French Ministry of Education and Research): "Analysis of traces of laundry surfactants in water". French government-Region contract plan, partnership with the soap and detergent industry's association.

Sub-project (6 months): "Isolation of pure polyethyleneoxide surfactant oligomers by preparative liquid chromatography." Partnership with Janssen-Cilag pharmaceutical society.

Expertise/Reviewing:

- Project expertise:

2019: project expertise for I2C Carnot.

2019: project expertise for LABEX Synorg.

- Reviewer for journals:

Talanta, J. Chrom. A, Analytica Chimica Acta...

J. Hazard. Mater., STOTEN, Pedosphere, Chemosphere, Env. Sci. technol., Env. Sci. Pollut. Res, Env. Toxicol. Chem., Env. Pollut...

SUPERVISION AND COORDINATION ACTIVITIES

Doctoral and M2 thesis supervision:

- Supervision of 8 doctoral thesis, defended in 2006, 2013, two in 2015, 2017, 2018, 2020 and 1 other in progress.

- Supervision of 8 Master 2 degree thesis, defended in 2000, 2002, 2006, 2007, 2016, 2018, 2020, 2021.

Projects-Networks coordination:

- Coordination of the "analytical chemistry team" in the multidisciplinary COPHERL project (Potential consequences of industrial accidents on human health and the environment, perception and resilience). (2019-2023).

- Sectorial lead for I2C Carnot (Innovation in Chemistry, grouping of 8 French research laboratories) (2017-2018). Coordination for maintaining a technological survey and to ensure the visibility for possible industrial partners in the "Energy and Environment" research sector.

- Coordination of the regional SEDEVAR project (Contaminated Sediments: decontamination, Valorization or reuse for Ecological Restoration) (2014-2016), pooling the expertise of 5 research teams of Universities of Rouen and Le Havre (France).

- Coordination of the regional RESSOLV project (Restoration of Vulnerable Sediments and Soils) (2010-2013), pooling the expertise of 4 research teams of Universities of Rouen and Le Havre (France).

TEACHING ACTIVITIES

- Teaching at Licence degree (L1, L2, L3) at University Institute of Technology IUT of Evreux (France) since 1994, in various fields of chemistry, for students or professionals (permanent formation): Thermodynamics, atomistic, polymers, crystallography, analytical chemistry, spectroscopy (UV, IR, Mass Spectrometry, RMN), chromatography, environment chemistry...

Responsabilities:

- 7 years (1999-2001; 2008-2010; 2014-2017) educational support (schedules, organization of teachers...) of the "Measurement Physics" department of Institute of Technology (IUT) of

Evreux (Normandie, France). 2 years responsible for students internships and contact with private companies (2019-2021).
